

## E-Z Grip Strap™ Instructions

The E-Z Grip Strap™ consists of the following components: A Uni-Loop connector, a strap and a neoprene pad.

1. Thread Uni-Loop through connection point on camera.

2. Thread Quick Disconnect through opening of Uni-Loop.

3. Pull Quick Disconnect to tighten knot.

4. Fasten Quick Disconnect on Uni-Loop to Quick Disconnect on strap. Lay the strap across the pad as shown.\*

5. Fold pad over strap and fasten with the five snaps.

6. Bring base plate with thumb-screw underneath camera as shown and fasten it to the tripod mount area.

7. Place hand through the pad to grip the camera.

\*The length of the strap is fully adjustable allowing you to fit the E-Z Grip Strap™ to your personal preference.
